'Champion of Energy Efficiency'

07.27.2011 | Faculty, Engineering

The American Council for an Energy-Efficient Economy named Kelly Kiskey, chair of the University of Dayton mechanical and aerospace engineering and clean and renewable energy programs, a "champion of energy efficiency."

The designation goes to leaders in the energy-efficiency field who have demonstrated excellence in program implementation, leadership, research and energy policy.

Past winners include Walmart and the Canadian Industry Program for Energy Conservation.

Kiskey just returned from Brazil where he was part of a U.S. Department of Energy and Global Sustainability Electric Partnership initiative to promote sustainable energy development. Kiskey, head of the University of Dayton's award-winning Industrial Assessment Center, helped develop university-based energy assessment programs.

Under Kiskey's leadership, the Industrial Assessment Center has won top awards from the U.S. Department of Energy and the state of Ohio.

Kiskey also has served on the Midwestern Governors Association Energy Efficiency Advisory Group and led the University of Dayton Industrial Assessment Center.
